COMPANY'S MISSION

● COMPANY'S MISSION

Our mission is to explore new possibilities in order to provide comfort and safety to our customers. Products Budmar: window and door systems; facade systems; fire systems provide warmth, protection from rain. They „defend” access to houses, apartments and other objects.

We value tradition, but with courage we look into the future and open ourselves for the challenges that the next decades of our activity will bring. Each window or door „tells its own story”. They are the beginning of a new chapter in the life of our Customers.

Budmar's work is inextricably linked with replacing the old with the new or installing joinery in completely new buildings. A new window or door „opens you up” to various possibilities. It can be a good start for personal development, business challenges, new relationships, achieving success and making dreams come true.

Creative and constructive. Now and forever.

We have been producing aluminum joinery for almost two decades. We work on trusted systems of leading brands such as Aliplast, Aluprof and Schueco.

We provide services to individual and business clients (including developers) from Poland and Europe. We are expanding to the US market.

REFERENCES

The company I represent has been cooperating with BUDMAR for over 10 years - since 2011. Through negotiations, we have repeatedly selected BUDMAR as the producer for aluminum window and door joinery in multi-family buildings in the development system and in other facilities in the area of general construction, where, by means of tenders, we signed contracts with other investors in accordance with the Public Procurement Act. Special attention deserve the high quality of our joinery and its precise installation, which brings satisfaction to our customers.

The company always complies with the contract terms regarding technical and technological matters and deadlines. We give BUDMAR a high rating and recommend their services to other investors.

On behalf of the eco-Archiplan Design Studio, I would like to express my satisfaction with the services of Budmar.

Our cooperation over several years has resulted in many interesting and unconventional solutions. The company performed a glass connector between our customer's two buildings and provided there window and door joinery. We could count on professional advice, ready-made technical solutions and professional installation. We often use the advice of the company's technologists when designing non-standard aluminum joinery systems.

I recommend Budmar as a reliable partner for cooperation.

When designing our new house and a beautiful large glazing, we got a contact to BUDMAR from our general contractor. At that time, we knew little about aluminum joinery, facades and sliding doors. Then came first estimations followed by many questions: which glass, design, colour and opening side to choose? And then we picked up the phone and arranged a meeting at the construction site. This is how we met Karol Marcinkowski, the owner of BUDMAR. He introduced us to the secrets of aluminum joinery, advised technical solutions and selected the right functionality for our needs.

Thanks to the comprehensive service of BUDMAR, we also decided to buy shutters and entrance doors for our dream house. The delivered products were marked by a very high quality and competitive price. Quick and efficient installation gave our house a unique character and look. If we were to choose one more time, we would definitely choose the joinery from BUDMAR. We highly recommend the company's products and services. With aluminum windows and doors, your house will be safe, warm and environmentally friendly. You can see the effects in the attached photos.
